Financial Projections

This presentation contains financial forecasts regarding certain financial metrics of the Company. These projections should not be relied upon as being necessarily indicative of future results. The independent auditor of the Company has not audited, reviewed, compiled, or performed any procedures with respect to the projections for the purpose of their inclusion in this presentation, and accordingly, it has not expressed an opinion or provided any other form of assurance with respect thereto for the purpose of this presentation. Hycroft does not undertake any commitment to update or revise the projections, whether as a result of new information, future events, or otherwise. In this presentation, certain of the above-mentioned projected information has been repeated (in each case, with an indication that the information is an estimate and is subject to the qualifications presented herein) to provide comparisons with historical data. The assumptions and estimates underlying the prospective financial information are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the prospective financial information. Accordingly, there can be no assurance that the prospective forecasts are indicative of the future performance of Hycroft or that actual results will not differ materially from those presented in the prospective financial information. The inclusion of the prospective financial information in this presentation should not be regarded as a representation by any person that the results contained in the prospective financial information will be achieved.

Cautionary Note Regarding Forward-Looking Statements

This corporate presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included in this corporate presentation and in public statements, and accordingly, it has not expressed an opinion or provided any other form of assurance with respect thereto for the purpose of this presentation. Hycroft does not undertake any commitment to update or revise the projections, whether as a result of new information, future events, or otherwise. In this presentation, certain of the above-mentioned projected information has been repeated (in each case, with an indication that the information is an estimate and is subject to the qualifications presented herein) to provide comparisons with historical data. The assumptions and estimates underlying the prospective financial information are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the prospective financial information. Accordingly, there can be no assurance that the prospective forecasts are indicative of the future performance of Hycroft or that actual results will not differ materially from those presented in the prospective financial information. The inclusion of the prospective financial information in this presentation should not be regarded as a representation by any person that the results contained in the prospective financial information will be achieved.

Forward-looking statements are often identified by future or conditional words such as “estimate,” “plan,” “anticipate,” “expect,” “intend,” “believe,” “target,” “budget,” “may,” “can,” “will,” “would,” “could,” “should,” “seeks,” “scheduled to” and similar words or expressions but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements are based on current expectations, estimates and projections that involve a number of risks and uncertainties, which could cause actual results to differ materially from those reflected in the statements. The risks include, but are not limited to: (i) risks related to changes in our operations at the Hycroft Mine, including risks associated with the cessation of mining operations at the Hycroft Mine; uncertainties concerning estimates of mineral resources; risks related to the lack of a completed feasibility study; risks related to metallurgical test work and process development; and risks related to our ability to re-establish commercially feasible mining and processing operations; and (ii) industry-related risks, including fluctuations in the price of gold and silver; the commercial success of, and risks related to, our exploration and development activities; uncertainties and risks related to our reliance on contractors and consultants; and the availability and cost of equipment, supplies, energy or reagents.

Any exploration target described in this corporate presentation does not represent, and should not be construed to be, an estimate of a mineral resource or mineral reserve. Ranges of potential tonnage and grade (or quality) of an exploration target are conceptual in nature; there has been insufficient exploration of the relevant property or properties to estimate a mineral resource; and it is uncertain if further exploration will result in the estimation of a mineral resource.

These and other risks may cause actual results to differ materially from those expressed or implied by the forward-looking statements, and the occurrence of one or more of these events or circumstances, alone or in combination with others, may have a material adverse effect on our business, cash flows, financial condition and results of operations. Please see the “Risk Factors” outlined in our Annual Report on Form 10-K for the year ended December 31, 2025, and in other reports filed with the SEC, for more information about these and other risks.

Given these risks and uncertainties, you are cautioned not to place undue reliance on these forward-looking statements. Although we have attempted to identify important factors that could cause actual results to differ materially from those described in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. Although these forward-looking statements are based on assumptions that we believe are reasonable when made, forward-looking statements are not guarantees of future performance and actual results, performance or achievements may differ materially from those made in or suggested by the forward-looking statements in this corporate presentation.

Any forward-looking statements made in this corporate presentation speak only as of the date of this corporate presentation. We undertake no obligation to update these forward-looking statements or to publicly announce the results of any revisions to any of those statements to reflect future events or developments, except as required by law.

Assumptions for Calculating AuEq Resources (Metric):

- **Commodity Prices:** **2026:** Gold = \$3,100/troy oz; Silver = \$36/troy oz / **2023:** Gold = \$1,900/troy oz; Silver = \$24.50/troy oz
- **Calculation Formulas (g/t):**
 - Au Equivalent (AuEq): **2026:** $Au + (Ag \times 0.0116)$ / **2023:** $Au + (Ag \times 0.0129)$
 - Ag Equivalent (AgEq): **2026:** $Ag + (Au \times 86.11)$ / **2023:** $Ag + (Au \times 77.55)$
- **Contained Metal Basis:** No metallurgical recoveries, smelter payabilities, treatment charges, or refining costs have been applied
- **Primary Disclosure:** Individual metal grades (Au and Ag) are the primary measure of the mineral resource. AuEq and AgEq are for **comparative purposes only** and **do not represent mineral reserves or economic viability**
 - **Cut-offs: 2026:** Heap leach — 0.027 - 0.055 AuEq g/t and flotation mill + concentration treatment by pressure oxidation and cyanide leaching — 0.206 AuEq g/t
 - / **2023:** Heap leach — 0.07 AuEq g/t and flotation mill + concentration treatment by pressure oxidation and cyanide leaching — 0.34 AuEq g/t
- **Rounding:** Totals may not sum exactly due to rounding

A World-Class Asset and Team

Tier 1 Jurisdiction

One of the world's largest gold and silver deposits in a Tier I Jurisdiction

High-Grade Silver

Two new high-grade silver discoveries represent a significant new value driver for the Hycroft Mine

Significant Upside

Significant upside potential – less than 10% of the land position has been explored and new discoveries being made

Well-Advanced

Development well-advanced with significant infrastructure on site and permitting in place compared to peers

Production-oriented

Completing engineering work for next phase of commercial operations

Safety Record

Award-winning safety record: Hycroft has maintained a TRIFR and LTI of 0.00 for more than three consecutive years

Cash Position

~\$192M unrestricted + \$14 M restricted¹

Our Approach

Develop Untapped Potential

- Expand recent high-grade discoveries
- Evaluate new potential underground opportunity on two high-grade silver systems

Advance Towards Production

- Complete technical studies for sulfide milling operation
- Finalize Roaster vs POX trade-off studies
- Assess restart of heap leach operations

Uncover District Potential

- +64,000-acre land package – only 10% explored
- Ongoing exploration to identify new targets beyond the current resource

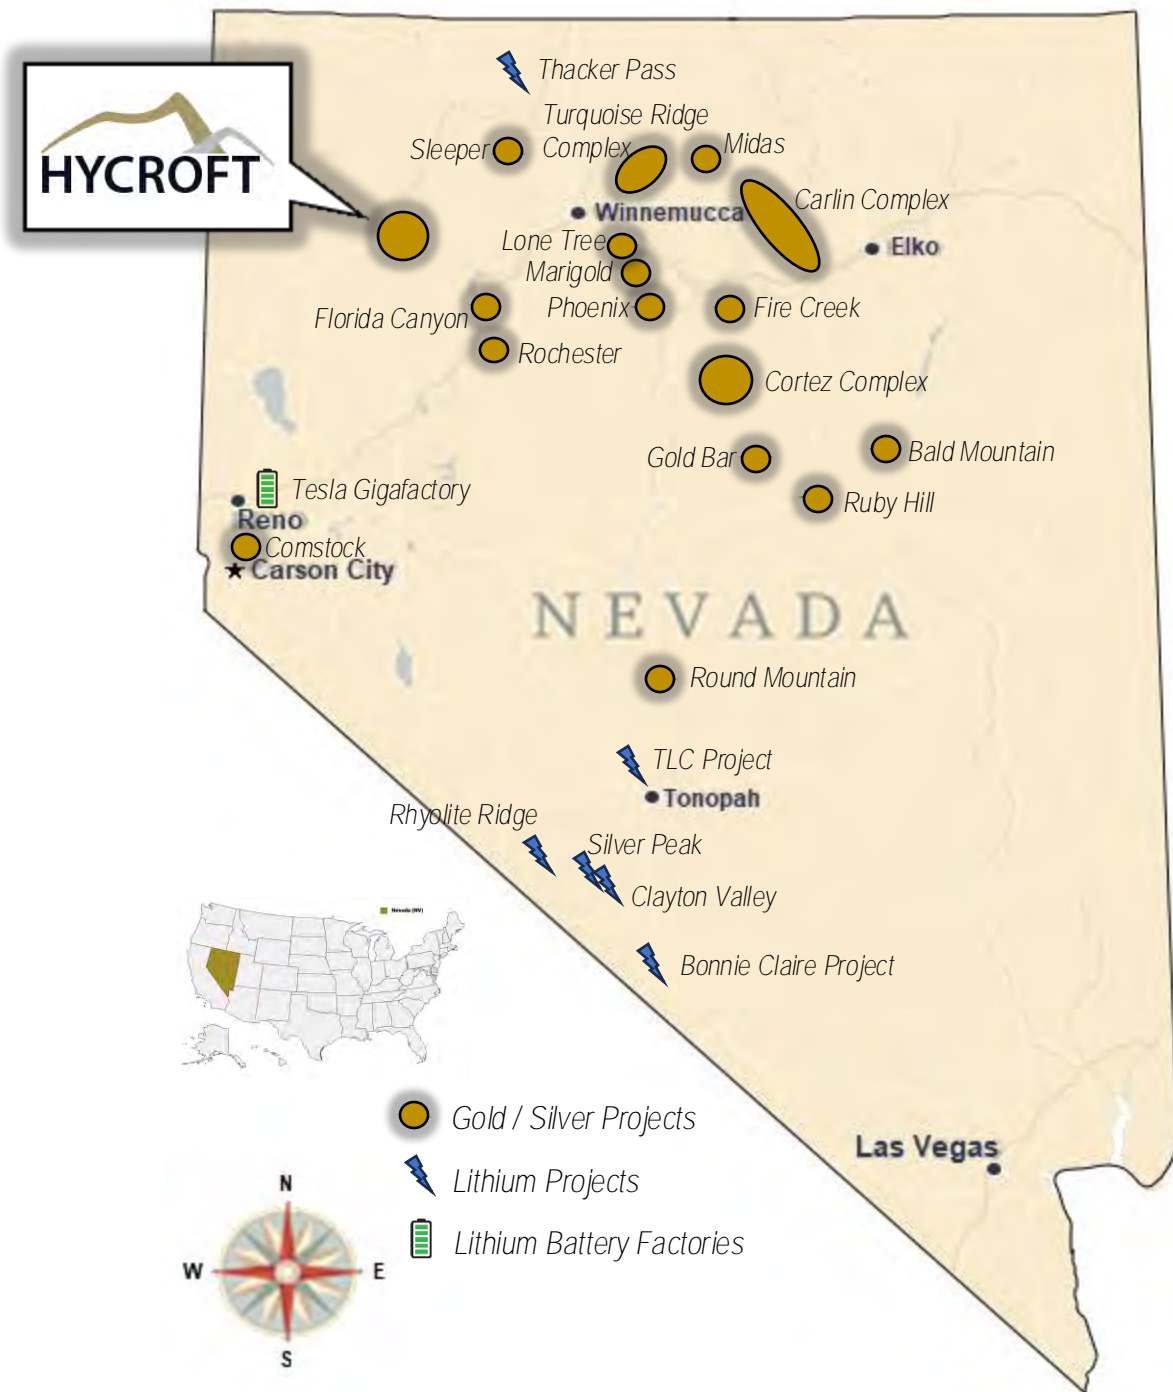

Operational Excellence

- Committed to outstanding safety performance
- Strong company culture focused on delivering value to stakeholders

Nevada

World's #1 Mining Jurisdiction

- Nevada leads the nation with the largest mining program in lower 48 states
 - > 40 Operating gold mines
 - > 100 Active mining operations (various minerals)
 - > 280 Active exploration permits
- Nevada is a significant producer of gold and silver
- Strong ethic towards effective and successful reclamation projects
- Favorable mining jurisdiction
- Excellent infrastructure
- Accessible labor / contractors
- Mining is second largest industry after gaming

A World-Class Asset

- Among the world's largest precious metals deposits
- Heap leach operations (1980s to 2021)
- Extensive infrastructure on-site
- Permitted for heap leach and milling operations
- New high-grade discoveries + new priority targets identified
- Large untapped district-scale land package
 - +64,000 acres
 - less than 10% explored

Property Overview

- Resource remains open in all directions and at depth
- Numerous targets within the land package

2025-2026 Drill Program

- ~26,000 meters of core drilling
- Two core drill rigs, 1 RC rig initially, adding 2 core rigs 2H2026 (5 rigs total)
- Target expansion of high-grade silver systems at Vortex and Brimstone

High-Grade Trends

- **New High-Grade Silver and Gold Mineralization Trends – Initial Resource Defined**
- **High-Grade Mineralization Remains Open Along Trends and at Depth**
- **Open Pit and Underground Optionality**
